Your Next Senior Front-End Engineer | React.js & MERN Stack Specialist

Computer Science graduate from IIIT Bhubaneswar, currently Senior Front-End Engineer at ConnectWise. Specialized in React.js and MERN stack (React.js, Node.js, Express, MongoDB) for building scalable, high-performance web applications with advanced JavaScript, HTML5, and CSS3. Experienced in unit testing frameworks to ensure code reliability, and skilled in optimizing API integration through cross-functional collaboration. Possess working knowledge of Core Java and MySQL for full-stack development. Passionate about user-centric design and code quality, consistently aligning technical solutions with business goals and fostering collaborative, results-driven teams.

EXPERIENCE

Senior Front-End Engineer

Mar 2024 – Present

Connectwise | Bengaluru

- Developed scalable, responsive user interfaces with React.js, JavaScript (ES6+), HTML5, and CSS3, delivering high-performance web applications.
- Led modernization to React.js architecture, implementing component-based design and state management (Redux/Context API) for improved efficiency.
- Implemented robust unit tests using Jest, React Testing Library, and Enzyme, ensuring code reliability and maintainability.
- Collaborated with Django/Python backend teams to optimize RESTful API integration and streamline data flow for full-stack application performance.
- Worked closely with cross-functional teams to deliver high-quality products and advocated React.js best practices, improving team efficiency.

Senior Analyst

Nov 2021 – Mar 2024

Accenture | Bengaluru, India

- Developed scalable, responsive user interfaces with React.js, JavaScript (ES6+), HTML5, and CSS3, delivering high-performance web applications.
- Led modernization to React.js architecture, implementing component-based design and state management (Redux/Context API) for improved efficiency.
- Implemented robust unit tests using Jest, React Testing Library, and Enzyme, ensuring code reliability and maintainability.
- Collaborated with Django/Python backend teams to optimize RESTful API integration and streamline data flow for full-stack application performance.
- Worked closely with cross-functional teams to deliver high-quality products and advocated React.js best practices, improving team efficiency.

Senior Engineer / Software Developer

Nov 2018 – Nov 2021

Comviva | Bangalore, India

- Developed and maintained web applications using React.js and Node.js, delivering scalable and high-performance solutions.
- Led creation of a Node.js automation framework with behavior-driven testing, reducing testing time by 50% and boosting efficiency by 30%.
- Provided Level 3 production support, resolving high-priority incidents and supporting UAT release activities.
- Collaborated with teams using Core Java, Spring Boot, Redis, and ELK Stack; contributed with foundational knowledge in some technologies.

EDUCATION

B.Tech, CSE | IIIT Bhubaneswar, Bhubaneswar

2014 – 2018

AWARDS

Smart India Hackathon 2017 – Finalist

Developed a hackathon solution for image classification using Convolutional Neural Networks with pre-trained models, leveraging Python, TensorFlow-Slim, and Java for Android.

PROJECTS

ConnectDevs – Full-Stack Developer Networking Application, [Link](#)

- Fullstack MERN App | React.js · Node.js · Express · MongoDB · AWS EC2 · Nginx · PM2

SKILLS

- Frontend Technologies (Core Expertise):** JavaScript, React.js, HTML5, CSS3, TypeScript, Responsive Web Design
- MERN Stack & Backend:** Node.js, Express.js, MongoDB (Mongoose), RESTful APIs
- Testing & Quality Assurance:** Unit Testing, Jest, React Testing Library
- Development Tools & Workflow:** Git, GitHub, GitLab, Babel, Webpack, npm, yarn
